

"I'm **TOTALLY** satisfied with the performance of your 7000! It never fails. It's the **best kitchen appliance we own**, and we encourage others to consider a distiller from Waterwise."

HENRY SIEGEL  
Los Angeles CA

"For over ten years I have relied on my Waterwise 7000 distiller for all of my drinking water needs—mixing beverages, preparing foods, cooking, drinking... **I know that my purified water is fresh, delicious and healthy.** If I go out, I always take a bottle or two of the water with me. The 7000 is so convenient simple and completely automatic. I'm glad to report that I have never had to be without my distiller—**its never had to be sent out for service.** I'm very, very, very satisfied with the distiller and the customer service Waterwise provides."

CHARLES BARTON  
Richmond VA

"Waterwise is one of the best additions we included in our custom-built home ten years ago. So many of our friends with children complain of having to buy bottled water for their families and all of the inconveniences that go along with that. **We love our distiller and its simplicity.** Even someone who isn't very handy can handle it!"

THE JONES FAMILY  
Fruitland Park FL

"Several years ago, we bought a Waterwise distiller to make distilled water a gallon at a time. We used this water for drinking, cooking and ice. However, after a few years I decided it was time to purchase a Waterwise 7000. We have used it for almost a year now and are pleased with the convenience that it offers. We have the 8 gallon unit with the pump to supply distilled water to a faucet at the sink and to the refrigerator icemaker. **This system has saved us (my wife especially) a lot of effort in making distilled water.** Fresh distilled water is always available at the push of a button. We would not want to go back to the days of using the gallon distiller. **We got used to using this system in a hurry.**"

TIMOTHY THAMES  
Littleton CO

"I had owned a gallon distiller for several years prior to the purchase of the Model 7000. The holding tank running out of fresh water has never been a problem! **Three children, pets, plants, and Mom all use the distiller water exclusively.** Another feature especially important was the prefilter accessory. Our well water is loaded with iron and sulphur. There is nothing more refreshing than a tall glass of cool water chilled with crystal clear ice, both from the distiller."

MARGE WRIGHT  
Hartsville SC

"We bought property that has five different wells—the last 275' deep, and there is still odorous water. The 7000 distiller makes ample, perfect water. **It's very easy to clean and has performed flawlessly for over ten years.** It would be hard to improve on."
