

"We have been using Waterwise distillers for 15 years. Presently we enjoy the 7000, which delivers great tasting water to our sink

and refrigerator. When we sold our last home, the 7000 system stayed since it helped us sell the house. The new owners love the system. We couldn't stand the thought of moving into the new home without one. We love the convenience and ease of care with our 7000. **Today, we drink more water than we ever have.** Our kids are hooked on distilled water, and when they left home, they took containers with them filled with good tasting distilled water. My system is a must. **Love it!** And the quality company that stands behind it."

"I believe my 12 gallon Waterwise distiller is one of the best investments I have made. What a pleasure it is to be able to turn the spigot and get a glass of fresh distilled water instead of having to worry with gallon jugs of 'distilled' water which I've had to haul from the grocery store. One great feature I love about my Waterwise distiller is the **easy way of cleaning the boiling tank—it's a breeze.** I have also found the Waterwise technical support to be great. I'm really glad that I chose Waterwise for my clean, pure drinking and cooking water."

DOUG SKINNER
San Benito TX

"I have been very pleased with my purchase from Waterwise. The service with my 7000 distiller has been top rate. We love the convenience of the machine. Water is always available and refills automatically. We have cleared up counter space by moving the distiller into the garage and attaching it to an outside faucet. Our experience has been very positive. With your product we have increased our intake of water and **the taste is head and shoulders above our tap water.**"

"I'm pretty tough on products that I buy. I expect a lot out of them and my water purifier is no exception. Well, **it has been over 15 years since I bought my 7000 and the bottom line is; it has been money well spent.** I looked at all of the competition and Waterwise had the best bang for the buck. The 7000 is not a cheap purifier but quality materials cost money and stainless steel is a nice thing. **In the words of a stock analyst, I rate the Model 7000 a strong buy!**"

JOHN BERCIK
Johns Island SC

"**This 7000 has a permanent place in my kitchen for over 10 years.** I have the 12 gallon reservoir and use the pump underneath to feed a self-filling water bowl for my basset hounds. Water is life and it gets awfully hot here in Texas, so they have a water bowl that never empties. **This thing is great!**"

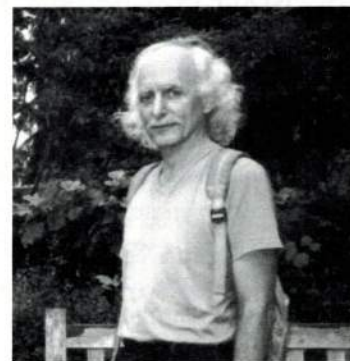

STEVE CANDIDUS
Spring TX

"I bought my Waterwise 7000 in November 1989 and years later, it's still going strong. I have never had a problem with it—just a gasket here and there. The 3 gallon holding tank is perfect for two people (my wife and I) and we've never run out of water. When people come over I like to fill three glasses with water. One distilled, one only filtered, one tap water. I let them taste each one and tell me which is which. **This taste test never fails.** I also appreciate the service and prompt answers to my queries over the years. Cheers to all the staff. Bottom line is—**it's easy to operate and better for your health.**"
